

Table 2 Percent indicating “much” enjoyment to first postpubertal coitus in original Kinsey sample, by 3 basic participant–partner age groupings; analyses done separately by gender

	Males			Females		
	Enjoy much (%)	<i>N</i>	Pairwise contrasts	Enjoy much (%)	<i>N</i>	Pairwise contrasts
Minor–peer	60	1,105	A	12	455	B
Minor–adult	41	548	B	13	286	AB
Adult–adult	41	2,546	B	18	2,898	A
Total	46	4,199		17	3,639	

1. *Note* For males, $\chi^2(2) = 122.56, p < .0001$. For females, $\chi^2(2) = 12.59, p < .01$. For each analysis (i.e., within gender), proportions without common letters (in pairwise contrasts column) are significantly different in pairwise contrasts (Marascuilo procedure)
